

EDUCATION

Degree/Course	Institute/University	GPA/Grade	Year
B.Tech	MIT Academy of Engineering, Pune	8.29/10 (Sem V)	2023-2027
Major	Indian Institute of Technology, Ropar	9.6/10 (Capstone)	2024-2026

EXPERIENCE

- Google Summer of Code Contributor 2026 - FOSSASIA** | [View Project](#) May 2026 - Present
Tech Stack: Python, Django, PostgreSQL, Vue 3, REST API, Celery, Redis, GitHub Actions, Django Channels Remote
 - Developing a standalone **Django plugin** for **native team and shift management**, enabling end-to-end team recruitment, role assignment, and scheduling for large-scale open-source events.
 - Engineered seamless core platform integration using **Django Signals** and **custom Middleware**, dynamically injecting component panels, navigation menus, and access-controlled **URL namespaces**.
 - Designed a scalable, **multi-tenant data architecture** supporting custom team roles, shift capacities, and complex application workflows using **PostgreSQL** and **Django ORM**.
- SortUs, Pune - Software Engineering Intern (Backend + ML)** | [GitHub](#) | [Certificate](#) June 2025 - Aug 2025
Tech Stack: React.js, Node.js, Tailwind CSS, JWT, FastAPI, Scikit-learn Pune, Maharashtra
 - Built ML-driven Green Points engine using **FastAPI** & **Random Forest** for real-time reward prediction.
 - Automated e-waste pricing via **multi-feature regression** and achieved **accuracy of $R^2 = 0.85+$** .

PROJECTS

- EKIA: Code Debugging Intelligence Assistant (Agentic AI + Full Stack)** Apr 2026
Tech Stack: Python, FastAPI, LangGraph, LangChain, Llama3/Ollama, FAISS, Neo4j, HuggingFace, Langfuse, Pydantic [GitHub](#)
 - Built a **5-node LangGraph agent pipeline** (parse → retrieve → reason → validate → respond) with **hybrid retrieval** by **FAISS** vector search & **Neo4j GraphRAG**, enabling context-aware error analysis across **25+ error patterns**.
 - Integrated **local Llama3 via Ollama** with **HuggingFace** embeddings (**all-MiniLM-L6-v2**), **Langfuse** tracing & confidence scoring, and a **React/Vite** dashboard featuring interactive force-directed knowledge graph visualization.
- Refine: AI-Powered Resume Optimizer & ATS Analyzer (Full Stack)** Jan 2026 - Feb 2026
Tech Stack: Python, Tailwind CSS, FastAPI, TypeScript, Pydantic, Gemini 2.5, SQLAlchemy, PostgreSQL, JWT [GitHub](#) | [Live](#)
 - Built resume optimizer raising **ATS scores by 45%** via prompt-engineered analysis, semantic score, & JD alignment.
 - Implemented **JWT + Argon2 auth with RBAC**, live **LaTeX preview**, & user profiles via **PostgreSQL/SQLAlchemy**.
- FinMate: Smart UPI-Based Expense & Budgeting Assistant (Android)** Nov 2025 - Apr 2026
Tech Stack: React Native (Expo), TypeScript, Regexp, SQLite, Supabase, PostgreSQL, REST APIs, Google OAuth [GitHub](#)
 - Built an SMS-based UPI parser with **92%+ accuracy** for extracting **amount**, **merchant**, and **UPI ID**.
 - Added **SQLite-backed** transaction & budget CRUD and **Zustand state management** with modular UI.

TECHNICAL SKILLS

- Backend & Web:** Python, C++, JavaScript/TypeScript, React.js, RestAPIs, Node.js, Django, OAuth/JWT
- AI/ML & Data:** Scikit-learn, HuggingFace, Transformers, Numpy, Pandas, LangChain, RAG, Neo4J, GraphRAG
- Cloud & Tools:** Google Cloud APIs, Git CI/CD, FastAPI, Redis, SQLite, PostgreSQL, Docker, Cursor, Claude

OPEN SOURCE CONTRIBUTION

- FOSSASIA, (Eventyay) - Developer (Open Source)** | [GitHub](#) Dec 2025 - Present
Tech Stack: Python, Django, PostgreSQL, Redis, Celery, REST API, JavaScript, Vue, WebSockets, Docker Remote
 - Implemented **email notification system** for registered team members by adding template conditionals and SMTP integration, followed by **email scheduling infrastructure with Celery Beat integration**.
 - Unified email handling into **single canonical field across 4 modules**, eliminating duplication and improving data integrity. Centralized email Reply-To logic by creating **unified helper function with SMTP context**.
 - Built **conditional field system with client/server logic**, enabling dynamic form behavior based on parent question values **reducing form complexity by 40%**.
 - Redesigned order form UI affecting **100% of ticket checkout flows**, fixed **3 critical data persistence bugs**.

ACHIEVEMENTS AND EXTRACURRICULAR ACTIVITIES

- CodeChef:** Rating **1682** | **3 Stars** | **Top 4.73%** | **Solved 400+ problems** | **2X Top 100** in Contests **196** & **199**
- LeetCode:** Rating **1668** | **Top 15.58%** | **Solved 200+ problems** | Global rank of **1950/27000+** in Contest **158**
- CodeForces:** Pupil with the rating of **1210 (Max)** | Global rank of **602/16000+** in Contest **1039**

Amazon ML Challenge 2025: Ranked in **Top 50** on Day 1 among **6500+ teams** who participated in the challenge.

HackRx 6.0 Bajaj Finserv: Built LLM Query Retrieval System for Health documents among **15,000+ teams**.

Adobe India Hackathon 2025: Competed among **2.5 lakh+ participants** and **95,000+ teams** in the challenge.
